

Coulson Ice Blast a Finalist for Prestigious R&D 100 Awards

Other finalists include NASA, Los Alamos National Laboratory, GM, IBM and MIT

Orlando, Florida, [August 10, 2017] Coulson Ice Blast's IceStorm⁹⁰ ice blasting machine has been selected as a finalist for the prestigious R&D 100 awards! The R&D 100 awards, considered the most prestigious recognition of innovation, were established by R&D Magazine in 1963 and have honored the 100 most innovative technologies of every year since.

Coulson Ice Blast is in good company, with other finalists for the award including NASA, Los Alamos National Laboratory, General Motors, IBM, HP, Dow Corning, Hitachi and MIT Lincoln Laboratory in recognition of projects that span advances in medical technology, gene expression profiling, drone flight software systems, material science, radiation shields for spacecraft, adhesives, microchip electronics and imaging technology, among many others. Winners are announced on November 17th.
